MARINE LOW VO
TRAINING COU
OPERATIONAL

Simulator / Facility

A full scale Terasaki Low Voltage simulator that lets trainees operate the switchboard as if they are
used for training. Equiped with real ACBs, fully functional switches and gauges, and real-ti
scenarios, alarms, and functionalities through the GAC POD, the simulator provides trainees the a
that they will have onboard vessels when operating switchboards.

Reasons to Attend the Course

This course covers topics on the low voltage electrical technology, application, safety, and ba
procedures onboard ships with written/practical exercises in operating and basic troubleshootin
equipment in compliance with Sections A–III/1 and A-III/6, and with Tables A-III/1 and A-III/6 of the
