in partnership with

ADVANCED TANK CLEANING COURSE

4 TRAINING DAYS
(2 DAYS LECTURE
2 DAYS PRACTICAL)

**MAXIMUM OF
10 TRAINEES
PER SESSION ONLY**

**OPEN FOR
DECK OFFICERS,
RATINGS AND CADETS**

**ENTITLED TO
A CERTIFICATE
OF COMPLETION**

Simulator / Facility

The training utilizes a Hybrid Chemical/Product Simulator, which consists of real tanks, pumps and equipment on a chemical/product tanker combined with a sophisticated full-mission cargo simulator. The training facility is equipped with actual equipment that can be found onboard ships. The above-mentioned real equipment can be used to simulate the exact procedures and system onboard the vessel for cargo tank preparation.

Reasons to Attend the Course

The scope of training covers the competences and the required knowledge, understanding and skills prescribed in Section A-V/1-1, Table A-V/1-1-2 of the STCW Code as amended. The course is designed to enable trainees to successfully demonstrate the competences, specifically, familiarize with physical and chemical properties of all cargoes; take precautions to prevent hazards and apply occupational health and safety precautions; and control compliance with legislative requirements; safely perform and monitor all cargo operations; take precautions to prevent pollution of the environment; and respond to emergencies.
