in partnership with

CHEMICAL AND PRODUCT TANKER SIMULATOR COURSE

6 TRAINING DAYS
(2 DAYS LECTURE
4 DAYS PRACTICAL)

**MAXIMUM OF
8 TRAINEES
PER SESSION ONLY**

**OPEN FOR DECK &
ENGINE OFFICERS,
RATINGS AND CADETS**

**ENTITLED TO
A CERTIFICATE
OF COMPLETION**

Simulator / Facility

The CPTS is constructed to realistically simulate tanks of a chemical tanker. It has two tanks with a capacity of 1000 m³ each. The front wall has glass windows for easy viewing of the cargo tanks while undergoing load/unload, stripping and tank cleaning operation from the outside. The facility also has a FRAMO pump operation. Trainees can assemble, disassemble, replace the cargo seal or mechanical seal, and disassemble/reassemble pumps for better appreciation and feel of the different FRAMO pumps elements.

Reasons to Attend the Course

The scope of training covers the competences and the required knowledge, understanding and skills as prescribed in Section A-V/1-1, Table A-V/1-1-2 of the STCW Code as amended. The course is designed to enable trainees to successfully demonstrate the competences, specifically, familiarize with physical and chemical properties of all cargoes; take precautions to prevent hazards and apply occupational health and safety precautions; and control compliance with legislative requirements; safely perform and monitor all cargo operations; take precautions to prevent pollution of the environment; and respond to emergencies.
