

Simulator / Facility

This training course utilizes a fully-functional Furuno ECDIS equipment models FEA 2807/2107 and FMD series typically found onboard modern ships. It is capable of demonstrating ECDIS set-up, manuals, chart handling, and software updating. It also has sensors, alarms for errors and other tools for loadin the ship's planned route.

Reasons to Attend the Course

The main goal of this course is to provide the Officer-In-Charge of navigational watch with the knowledg and proficiency in the use of FURUNO brand models within the series. Those successfully completing th training shall have necessary confidence in operating FURUNO ECDIS equipment for planning, monitoring safe navigation using electronic charts, thus fufilling the STCW-2010 regulation II/1 and II/2 STCW-2010 code A-II/1 and A-II/2.
