Simulator / Facility

The theoretical part of the course, lectures and demonstrations will be held in a classroom with set of functional equipment, while the practical exercises will be demonstrated through use of a full mission Crude Oil Tanker Simulator and other safety related equipment.

Reasons to Attend the Course

This course covers the mandatory competences and the required knowledge, understanding and proficiencies prescribed in paragraph 3 of the STCW Code as amended. The course is designed to enable the trainees to successfully demonstrate specific competences such as:

- safely perform and monitor all cargo operations;
- take precautions to prevent hazards;
- take precautions to prevent pollution of the environment;
- apply occupational health and safety precautions; and
- monitor and control compliance with legislative requirements
