

STK Maritime and Technical Training Center, Inc. was established in February 2015 with a mission of providing quality training services to enhance competency of seafarers in compliance with the standard requirements of the STCW Convention, MARINA, and other governing regulatory bodies.

STK Maritime was accredited by MARINA to offer MARINA Approved Training Programs.

Recognizing the need to enhance the competency of all Shipboard personnel and the specific requirements of Shipping principals, STK Maritime offers in-house training courses to update Shipboard personnel on current changes in maritime legislations and development of new technologies affecting shipboard operations. This includes specialized training courses with the use of Kongsberg Polaris Ship Bridge Navigation and Neptune Engine-room Simulators

Courses offered in behalf of IMMAJ-PJMCC Foundation, Inc.:

- [Trim and Stability for Bulk Carrier Transporting Solid Bulk and Grain Cargoes \(TSBC\) Course](#)
