A CERTIFICATE
OF COMPLETION**

Simulator / Facility

For the practical part of the course, an Oily Water Separator equipment, which is a static bilge separator in compliance with IMO resolution MEPC.107 (49) manufactured by Taiko Kikai Industries Co., Ltd. is being used. The equipment is a FOCAS-2000 model ensures compliance to relevant international and local regulation and classification society requirements.

Reasons to Attend the Course

This course covers the competence and the required knowledge, understanding and proficiencies prescribed in STCW Code III/1 Function: Controlling the operation of the ship and care for persons on board at the operational level. Attendance to this course will ensure that the seafarers are trained in the state-of-the-art equipment giving a realistic shipboard environment and comprehensive knowledge on the operation of the Oily Water Separator with Oil Content Meter which will comply in various flag and class society requirements.
