In-house Training Center

MARINE HIGH VOLTAGE TRAINING COURSE MANAGEMENT

2 TRAINING DAYS
(1 DAY LECTURE
1 DAY PRACTICAL)

**MAXIMUM OF
12 TRAINEES
PER SESSION ONLY**

**OPEN FOR LICENSED MANAGEMENT
LEVEL ENGINE OFFICERS
AND ELECTRO TECHNICAL OFFICERS
WITH MALOHIVO CERTIFICATE**

**ENTITLED TO
A CERTIFICATE
OF COMPLETION**

Simulator / Facility

A full scale Terasaki High Voltage simulator that lets trainees operate the switchboard as if they are onboard a vessel for training. Equipped with real VCBs, fully functional switches and gauges, and real-time reactions of systems and functionalities through the GAC POD, the simulator provides trainees the actual experience of operating onboard vessels with high voltage switchboards. The equipment also includes actual testing equipment such as a voltage insulation tester and vacuum checker for periodic maintenance and troubleshooting activities of the switchboard.

Reasons to Attend the Course

The course uses extensive practical exercises on modern high voltage equipment and aims to familiarize management level engine officers on the High Voltage Switchboard, its functions, theories behind operation and management of operation in High Voltage systems. Attendees will also be able to carry out required maintenance tasks, safe High Voltage isolation, switching operations, and basic troubleshooting onboard ships that utilize high voltage systems. Learning outcomes and competences are in accordance with Sections A-III/2 and B-III/2, and Table 1 of the STCW Code.
